16. REMARKS *(Continued)*

BLK's 11 - 13: Deliver per Task Order

BLK 14: The Contractor shall transmit all deliverables by posting to the Government's Configuration Management tool. All deliverables will be in native file formats; Adobe PDF or document images are unacceptable unless explicitly directed by the Government or prior written approval has been obtained from the Government. Digital media will conform to the guidance in ASN RDA Policy Memo, "DON Policy on Digital Product/Technical Data" of 23 Oct 04. Any deliverables containing classified information will be submitted in Compact Disk (CD) to the PMW-160 Configuration Manager using appropriate means.

OMB No. 0704-0188

The public reporting burden for this collection of information is estimated to average 110 hours per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing the burden, to the Department of Defense, Executive Services Directorate (0704-0188). Respondents should be aware that notwithstanding any other provision of law, no person shall be subject to any penalty for failing to comply with a collection of information if it does not display a currently valid OMB control number. Please do not return your form to the above organization. Send completed form to the Government Issuing Contracting Officer for the Contract/PR No. listed in Block E.

16. REMARKS

Submit in Microsoft Office 2003 format using DID and the following guidance:
Contractor shall maintain and update the Integrated Master Plan submitted with the proposal that details work tasks, critical events with associated success criteria, and the processes required to successfully achieve contract requirements and to mitigate the inherent risks. The Integrated Master Plan should include events, accomplishments, and criteria that help determine attainability of program objectives and evaluate government and contractor team progress toward meeting the program objectives. The Integrated Master Plan should describe both the baseline and risk mitigation path and identify, among other things, the critical dates for the delivery of LSI and/or Government GFE/GFM products. The Plan shall also cover the management approach to IMS, as well as all critical program elements, including trade studies, analysis, design, integration and test.

BLK 4: Under Paragraph 3.2.m of the DID, the contractor shall include detail regarding the documentation management approach in the IMP, to include:

1. The overall program methodology and approach for managing program documentation.
2. The integration of document change control procedures across Program Management, Systems Engineering, and Logistics functional areas.
3. Detail regarding how the contractor ensures program documentation is accurate, well organized, and available to appropriate program individuals.
4. Tracing of all contract-specified documents developed over the course of the CANES program.
5. The methods and procedures to be followed for tracking each document.
6. The establishment of Document Change Control Matrix (DCCM).
7. Procedures to assess the impact of changes to any DCCM listed document on all other DCCM listed documents when a DCCM listed document is changed.

BLK's 10 - 13: Deliver per Task Order

BLK 14: The Contractor shall transmit all deliverables by posting to the Government's Configuration Management tool. All deliverables will be in native file formats; Adobe PDF or document images are unacceptable unless explicitly directed by the Government or prior written approval has been obtained from the Government. Digital media will conform to the guidance in ASN RDA Policy Memo, "DON Policy on Digital Product/Technical Data" of 23 Oct 04. Any deliverables containing classified information will be submitted in Compact Disk (CD) to the PMW-160 Configuration Manager using appropriate means.

16. REMARKS *(Continued)*

BLK 14: The Contractor shall transmit all deliverables by posting to the Government's Configuration Management tool. All deliverables will be in native file formats; Adobe PDF or document images are unacceptable unless explicitly directed by the Government or prior written approval has been obtained from the Government. Digital media will conform to the guidance in ASN RDA Policy Memo, "DON Policy on Digital Product/Technical Data" of 23 Oct 04. Any deliverables containing classified information will be submitted in Compact Disk (CD) to the PMW-160 Configuration Manager using appropriate means.

Prime contractors are responsible for flowing down IMS requirements contained in their prime contracts to all subcontractors who meet the reporting thresholds. This Central Repository instruction applies to each separate IMS requirement included in the contract.

Major critical non-Firm Fixed Price subcontracts with a dollar value greater than \$20M will have applied to them the requirements of DI-MGMT-81650, Integrated Master Schedule. IMS required from subcontractors will be integrated with the prime contractor's scheduling system. IMS' required from subcontractors will be provided in subcontractor's approved scheduling system in its original format.

Requirements Traceability Matrix Attributes

Attribute	Description	Possible Values
Requirement UID	A unique alphanumeric identifier for each single requirement.	<i>Existing and [TBD by contractor]</i>
Short Name	A short description of the requirement content.	<i>Existing and [TBD by contractor]</i>
Parent UID(s)	The requirement(s) from which the requirement is derived.	<i>Existing and [TBD by contractor]</i>
Requirement Statement	A singular documented need.	<i>Existing and [TBD by contractor]</i> <u>Note:</u> requirements should be 'SMART' (Specific / Singular, Measurable, Achievable, Realistic, Traceable).
Use Case Allocation(s)	Allocation of a requirement to a Use Case within the AS	Existing Use Case ID
RH/N	The entity in the Requirements Hierarchy and/or Network (RH/N) by which the requirement has been grouped or 'binned.'	<i>[TBD by contractor]</i>
FAM Allocation(s)	Reference to the associated element(s) of the Functional Architecture Model (FAM) by which the requirement is satisfied.	<i>[TBD by contractor]</i>
CI(s)	Reference to the associated Configuration Item(s) that satisfy the requirement	<i>[TBD by contractor]</i>
Product	Reference to the associated Product(s) that satisfy the requirement	<i>[TBD by contractor]</i>
Status	Indicates the current state of the requirement	<u>Any one or more of the following:</u> <ul style="list-style-type: none"> • Approved [indicate SETR event & date in Notes attribute] • Rejected [indicate reason in Notes attribute] • Proposed • Design-only • Funded • Unfunded • Subcontracted [indicate contract #] • [Other categories TBD by contractor]
Owner	Indicates the IPT or individual responsible for the successful verification of the requirement.	<i>[TBD by contractor]</i>

Attribute	Description	Possible Values	
Notes	General notes pertaining to the requirement.	<i>[TBD by contractor]</i>	
<i>[TBD by contractor]</i>	<i>[TBD by contractor]</i>	<i>[TBD by contractor]</i>	
Verification Method	The method of verifying acceptance of a particular requirement.	A	<u>A</u> nalysis or review of data is a study method resulting in data used to verify conformance of characteristics with specified requirements.
		D	<u>D</u> emonstration is a variation of the test method used to verify conformance of functional characteristics with specified requirements by go/no-go criteria. This type of verification method applies when observing a behavior or the result of the behavior can verify the requirement.
		I	The <u>I</u> nspection method determines system characteristics by examination of and comparison with engineering drawings or flow diagrams and computer program listings during product development to verify conformance with specified requirements.
		T	The <u>T</u> est method verifies conformance of functional characteristics with operational and technical requirements. The test process will generate data, and these data are the test record generated by measurement equipment or procedures. The analysis or review performed on the data derived from the testing provides the verification of a requirement.
