

Item	Document Name and Version	Section/Block #	Question	Response
1	Atch 01 Performance Work Statement N00039-12-R-0009.docx		Do we need to respond to each VSSD site with a proposed fiber solution. Or due to the small seat count at most of these locations will DSL or Cable modem solution suffice?	No you do not need to respond to each VSSD site with a proposed fiber solution. Regardless of the type of circuit for VSSD (Fiber, Cable or DSL) those services are provided through another Navy contract.
2	Atch 01 Performance Work Statement N00039-12-R-0009.docx		For accurate pricing via Attachment 7, would we would "lump" the sites by Region, RNOSC, MCNOSC & MITSC on Attachment 7?	The USMC requirements are stated in Attachment 19, USMC Transport CLIN Definitions, and Attachment 20, USMC Enterprise Services CLIN Definitions, and are broken out by region. These attachments are used to price CLINs 0003 and 0004 in Attachment 7.
3	Atch 07 Pricing Format		PRICING - The way I interpret it is we are to submit pricing via Attachment 7 for TXS, and use Attachment 10 as a guide for each "item entry"; then use Attachment 8 for Equipment cost. Please advise direct guidance on accurate pricing (or) confirm.	The solicitation in its entirety is to be reviewed and considered as offerors develop pricing. Pricing for priced labor and equipment CLINs is to be captured in Attachment 7. Attachment 8 is where labor and equipment pricing for unpriced CLINs are captured.
4	Atch 01 Performance Work Statement N00039-12-R-0009.docx	3.3.18.1	Requesting clarification on Pierside Op's. are we expected to bring cable plant to the Piers/Wharfs from the Telco Room(s) once on the base; or is delivery transparent on the existing infrastructure? And if we are extending plant to the Piers, is that costing to be priced on the Rate Card (ATTCH 8)?	No, the Cable Plant exists today. The Navy's requirement is articulated in section 3.3.18.1c of the NGEN PWS.
5	Section L		In response to item #67 in the Question and Answer Set #1, the only separate volumes required for scenario 1 and 2 (Method A or Method B) are for Volume 1- Technical Proposal and Volume 5 - Pricing. In other words we do not need to provide duplicate Management, Small Business, Past Performance and Contracts Volumes. Please confirm.	As clarified in Question and Answer Set #1, question number 67, offerors submitting ES and/or Combined proposals are to submit separate technical and price volumes for Scenarios 1 and 2. Per Table L-14-2, the technical volumes include Volumes 1, 2, and 3. The price volume consists of Volume 5. Volumes 4 and 6 do not need to be submitted separately.

NGEN Final RFP Industry Questions Wave 6
31 July 2012

6	Section L		<p>Attachment J-7 (Pricing Format_Rev4) lists the \$150M GFP Price Adjustment in the "TXS Price Detail" sheet of the excel workbook. Since the purchase of End User Hardware is a function of the ES provider, we were expecting to only see the \$150M GFP Price Adjustment on the "ES Price Detail Scenario 1" and the "Combined Price Scenario 1" sheets in the excel workbook.</p> <p>Can you confirm if it is truly the Government's intent to adjust the TXS price by \$150M in addition to the ES price for scenario 1?</p>	<p>It is not the Government's intent to adjust the TXS price by \$150M in addition to the ES price for scenario 1. An updated Attachment 7 (Pricing Format) will reflect this change in Amendment 0017.</p>
7	Section L		<p>In response to item #8 from Wave 4, "For clarification to "the list of sites being questioned are provided." are you referring to Attachment 10 in this response?</p>	<p>No. The Consolidated Facilities Baseline Inventory located on the NGEN technical data repository is the listing of all active sites.</p>
