

**STATEMENT of WORK
TESTDIRECTOR SOFTWARE UPGRADE**

SAP Requisition 7000010393

1.0 Introduction

The Enterprise Resource Planning (ERP) project at SPAWARSYSCEN San Diego currently uses Mercury Interactive's software product called Test Director (TD). This is a vital tool for creating, running, and logging various test and debug scenarios for the ERP project's SAP software environment.

2.0 Scope

The contractor shall provide the required engineering support to upgrade TestDirector software to facilitate the required enhancements to increase functionality. The contractor shall provide user training in the upgraded version.

3.0 Technical Requirements

3.1 Initial TestDirector Upgrade Review and Plan

3.1.1 Description

Contractor shall meet with government representatives to discuss overall requirements, review current configuration, and for planning implementation and training schedules.

3.1.2 Acceptable Quality Level

Contractor shall provide a plan that accurately reflects all steps required for implementing the TestDirector version 6.0 to 8.0 upgrade.

3.1.3 Method of Tracking Progress

Government personnel responsible for using, maintaining, and administering TestDirector will review the implementation plan for realism and accuracy.

3.2 TestDirector Upgrade to Version 8.0

3.2.1 Description

The contractor shall perform all required upgrades to bring the TestDirector application from version 6.0 to 8.0. The new version shall have increased functionality and will be higher performance, allowing greater ease of use and more efficient running and debugging of test scenarios. The new version will be web based with software plug-ins.

3.2.2 Acceptable Quality Level

Contractor shall show that the new version of TestDirector works as implemented.

3.2.3 Method of Tracking Progress

Contractor shall demonstrate all features of the new version of TestDirector to government personnel responsible for using, maintaining, and administering this product.

3.3 User and Administrator Training

3.3.1 Description

The contractor shall perform training for TestDirector users and administrators as needed.

3.3.2 Acceptable Quality Level

The training for TestDirector users and administrators shall cover all areas required to fully utilize the software.

3.3.3 Method of Tracking Progress

TestDirector users and administrators shall be able to administer and run the software after the training is complete.

3.4 Knowledge Transfer Support

3.4.1 Description

The contractor shall perform knowledge transfer for the TestDirector software as needed.

3.4.2 Acceptable Quality Level

The knowledge transfer for TestDirector software shall cover the administrative and user areas of the software.

3.4.3 Method of Tracking Progress

Government personnel will have a thorough understanding of how the TestDirector software operates after knowledge transfer is complete.

4.0 Government Furnished Equipment

None. The contractor will work in the ERP lab and have access to TestDirector data.

5.0 Travel

1 trip, 1 person, 10 days, Landover MD to San Diego, CA and return.

6.0 Other

6.1 Place of Performance

Work is to be performed at SPAWAR Systems Center in San Diego, CA.

6.2 Security

Unclassified.
